

BETTER CARE

>>> Essential Tools for Quality Care

Web-based tools to improve resident care and drive continuous improvement within the facility and for each individual resident.

BETTER RESULTS

>>> *eHealth Data Solutions*

eHealth Data Solutions is committed to providing innovative web-based tools for information and data management that improve the quality of long-term care. Our solutions – **CareWatch**,[®] **RiskWatch**[®] and **UBWatch**[™] – support evidence-based decision processes that increase productivity, reduce risk, and improve quality through cost effective, resident-centered care and services.

Our solutions provide leaders with opportunities for critical thinking, which leads to informed action. And informed action produces better results.

 **CareWatch**[®] features a series of clinical Watch Pages that helps nursing staff track trends, monitor quality efforts, target reimbursement, maximize MDS accuracy and improve survey performance.

 **RiskWatch**[®] focuses on the adverse event process of investigation, response, and review to provide insight into root cause, reduce risk, decrease liability, lower insurance premiums, and improve resident care.

 **UBWatch**[™] detects and reveals unintended billing patterns that can lead to suspended claims, CMS audits, government demand for repayments, False Claim Act issues, under/over billing, and other missed opportunities that may result in lower revenue.

Recent Innovations from eHealth Data Solutions:

- Advancing Excellence Support
- RUG IV Budgeting Model
- QualityWatch[™]

We also provide unparalleled training and support.
