Iowa Health Care Association

Dementia Care Workshop

Implementing and sustaining effective dementia training and behavior prevention initiatives can be difficult in even the most-committed organizations. Providers are encouraged to send their entire team to this high-energy, day-long program that will provide an innovative and do-able approach to dementia care. The workshop will offer caregivers proven tools, tips, and approaches to dementia care.

Workshop Description

Join Teepa Snow for a workshop that will provide essential information on how to have a positive and meaningful relationship with people living with Alzheimer's and dementia.

This workshop will help healthcare staff develop and offer engagement opportunities and activities that are effective, valuable, doable, appropriate and practical when providing care and support for someone living with dementia.

Teepa will teach her Senior Gems® approach to Dementia Care, which provides the right environmental support, care assistance, and daily activities for each stage of the disease. Caregivers will learn strategies to reduce conflict, improve interactions, and work together with the people in their care. Teepa believes all individuals, whatever their state of being, in the right setting, and with the right care, can shine!
