Point of Contact (Community Pharmacy, CVS, Walgreens)
From: Iowa Department of Public Health
Re: LTC- Pharmacy Partnership Program

Thank you for joining the Iowa Department of Public Health (IDPH) and the representatives from Community Pharmacy, CVS Pharmacy, and Walgreens Pharmacy on the webinars last week. IDPH is sharing the following information and requests in preparation for your local vaccination campaigns.

1. Each pharmacy chain has identified a primary point of contact for LTCs. The pharmacy chains request to please utilize these points of contact for information regarding the assigned pharmacy under the national program.
2. Documents from each of the pharmacy chains detailing information regarding their respective approaches to implementing the program are posted on the HAN. In addition, documents will be sent to LeadingAge Iowa and the Iowa Healthcare Association for distribution to partners. Also included is the most current version of the CDC spreadsheet with the enrolled facilities and the matched pharmacy.
3. Local Public Health Agency Partners - The LTC- Pharmacy Partnership Program does not require LHPAs to electronically allocate vaccine to the identified chain pharmacies. CDC and IDPH will be responsible for the allocation of vaccine to the pharmacies at the federal level.
4. IDPH understands this is an exciting, anxious, and stressful time as work continues to vaccinate this priority population. Please be patient and remain committed to the LTC- Pharmacy Partnership Program. Decisions to deviate from the program at this point will have negative consequences for the overall vaccine campaign.

Pharmacy	Website	Primary POC	Email	Phone
Community Pharmacy	pending	Mackenzie Farr, COO	mfarr@cpharmrx.com	402-669-3511
